

## Aluminum

Sizes (thickness) available - (in inches)

.032 .040 .050 .063 .080 .090 .100 .120 .125 .160 .190

3003-H14 - Non-heat treatable.

5052-H32 - Non-heat treatable. Pliable. Good cold forming characteristics.

6061-T6 - Heat treatable. Harder than T4. Will crack if bent or formed especially in direction of grain. More rigid than 5052. Good for flat parts.

6061-T4 - Heat treatable. Softer than T6, but will also crack when formed in direction of grain with 1-1/2 metal thickness radius.

Steel - cold rolled -also available in electro-galvanized, pre-plated, "Paint Grip", "Galvaneal"

Sizes available - (inches)

Gauge	Thickness
24	.0239
22	.0299
20	.0359
18	.0478
16	.0598
14	.0747
13	.0897
12	.1046
11	.1196

Stainless Steel - Type 304, No. 2B finish, or No. 3 polished on one side.

Sizes available - (inches)
